WAVEFORM

we call it
**exotic
electronica**

Since 1994, the Waveform label has remained on our unerring but deliberate path of establishing, exposing and defining this sensual and stimulating genre of music that we call "exotic electronica" -whirly, swirly, sometimes dubby, sometimes dreamy soundscapes from around the planet. It's positive, timeless music for intellectual stimulation, dedicated to a sustainable future. Waveform titles originally released over ten years ago still sound as relevant, fresh and dynamic today as when they originally appeared in the marketplace. We strive for consistent quality throughout too, so when you listen you'll come away with the feeling that every track is a good one.

Here's the latest incarnation of our always-growing catalog of releases. Please visit us online at waveformhq.com or waveformrecords.com for the most recent information on our releases, special direct sales offers, links for instant downloading of every song and album and two minute sound samples of every song in our catalog.
